

1 cm

1 inch

Each solar array mast is, in total, 23 cm long. You will need two. I used 1.5 mm copperwire

solar panels in folded position.

the ATV can be installed into the Ariane V model, with some modifications to the shroud.

Due to an error in construction some

pictures of the manual are not correct.

Keep all seams of main body parts in

one line!

glue to 1mm card
